

AP Research Initial (Summer) Assignment

Research and explain each of the following categories of research design, then describe two of the main types of the category listed in parentheses beside that research design:

Qualitative (case study, grounded theory, phenomenology, ethnographical, historical)

Quantitative (descriptive, correlational, quasi-experimental, and experimental)

AP Research

A. Think back on what you studied in the AP Seminar Course. List some topics that come to mind.

1. _____

Q: _____

2. _____

Q: _____

3. _____

Q: _____

4. _____

Q: _____

5. _____

Q: _____

B. Skim your notebook/notes from AP Seminar for references to the topics you have listed. Reread the information you find.

C. Think of a question for *each* topic **that you cannot answer without further investigation**. Write the questions under the topics listed above

D. Now think of a topic that you did *not* study this past year and a question for that topic **that you cannot answer without further investigation**.

6. _____
